

SAMPLE PRESENTATION FOR INSTITUTION EMPLOYEES

Corporate Account Takeover & Information Security Awareness

The information contained in this session may contain privileged and confidential information. This presentation is for information purposes only. Before acting on any ideas presented in this session; security, legal, technical, and reputational risks should be independently evaluated considering the unique factual circumstances surrounding each institution. No computer system can provide absolute security under all conditions. Any views or opinions presented do not necessarily state or reflect those of **“Your Institution Name”** or any other entity.

What will be covered?

- 🛡️ **What is Corporate Account Takeover?**
- 🛡️ **How does it work?**
- 🛡️ **Types of Security Threats and Countermeasures**
- 🛡️ **Current Trends**
- 🛡️ **How to Protect?**
- 🛡️ **How to Detect?**
- 🛡️ **What to do when Fraud happens to me??**

What is Corporate Account Takeover?

A fast growing electronic crime where thieves typically use some form of malware to obtain login credentials to Corporate Online Banking accounts and fraudulently transfer funds from the account(s).

Cyber threats to financial institutions and other national critical infrastructure is real and growing at an alarming rate.

Estimated 40,000 Chinese hacking groups

Average age ~ 2X years

Income: \$2-3 Million per year

How does it work?

- 🕒 **Criminals target victims by scams**
- 🕒 **Victim unknowingly installs software by clicking on a link or visiting an infected Internet site.**
- 🕒 **Fraudsters begin monitoring the accounts**
- 🕒 **Victim logs on to their Online Banking**
- 🕒 **Fraudsters Collect Login Credentials**
- 🕒 **Fraudsters wait for the right time and then depending on your controls – they login after hours or if you are utilizing a token they wait until you enter your code and then they hijack the session and send you a message that Online Banking is temporarily unavailable.**

Types of Security Threats & Countermeasures

Malware

- 🖥️ **Short for *malicious software*, is software designed to infiltrate a computer system without the owner's informed consent.**
- 🖥️ **Malware includes computer viruses, worms, trojan horses, spyware, dishonest adware, crimeware, most rootkits, and other malicious and unwanted software.**

Viruses

- 🧑‍💻 **A computer program that can copy itself and infect a computer.**
- 🧑‍💻 **The term "virus" is also commonly, but incorrectly used to refer to other types of malware, adware, and spyware programs that do not have the reproductive ability.**
- 🧑‍💻 **Some viruses try to avoid detection by killing the tasks associated with antivirus software before it can detect them.**

Spyware

- 🕒 **Type of malware that is installed on computers and collects little bits of information at a time about users without their knowledge.**
- 🕒 **The presence of spyware is typically hidden from the user, and can be difficult to detect.**
- 🕒 **It can install additional software, redirecting Web browser, change computer settings, different home pages, and/or loss of Internet.**

The image shows a screenshot of a web browser window titled "Advanced card verification". The page features the VISA logo and the text "Advanced verification." Below this, a red warning message reads: "For security reasons please provide information requested below". The form contains the following fields:

- Card Type: A dropdown menu currently set to "Debit".
- Card Number: A single-line text input field.
- Expiration Date: Two single-line text input fields separated by a forward slash.
- CVV2: A single-line text input field.
- ATM PIN: A single-line text input field.

At the bottom of the form is a "Process" button.

Hello!

We were not able to deliver your package because the address is incorrect. Please print and mail the label to the address below.

Your United States Postal Service

This email is fraudulent.
It is not addressed to you by name.
The FROM address is nonsense.
The fraudster is counting on you to open the zip and execute the enclosed computer virus.

E-mail Usage

- 🌐 **Some experts feel e-mail is the biggest security threat of all.**
- 🌐 **The fastest, most-effective method of spreading malicious code to the largest number of users.**
- 🌐 **Also a large source of wasted technology resources.**
- 🌐 **Examples of corporate e-mail waste:**
 - 🌐 **Electronic Greeting Cards**
 - 🌐 **Chain Letters**
 - 🌐 **Jokes and graphics**
 - 🌐 **Spam and junk e-mail**

Hoaxes

- 🟢 **Hoaxes attempt to trick or defraud users.**
- 🟢 **A hoax could be malicious, instructing users to delete a file necessary to the operating system by claiming it is a virus.**
- 🟢 **It could also be a scam that convinces users to send money or personal information.**
- 🟢 **Phishing attacks fall into this category.**

🛡️ Where does it come from?

- 🛡️ Malicious websites (including Social Networking sites)
- 🛡️ Email
- 🛡️ P2P Downloads (e.g. LimeWire)
- 🛡️ Ads from popular web sites

🛡️ Web-borne infections:

According to researchers in the first quarter of 2011, 76% of web resources used to spread malicious programs were found in 5 countries worldwide ~ United States, Russian Federation, Netherlands, China, & Ukraine.

What your institution can do!

PROTECT

Know your Customers - Develop a Risk Assessment:

Determine which customers are high-risk

Types of transactions – wires, institution to institution, SEC Code, daily files, high limits/frequencies, financial stability

Provide Ongoing Security Awareness Training for BOTH Employees & Corporate Customers

TRAIN! TRAIN! TRAIN!

Make sure that your Customers are Aware of Basic Online Security Practices

Review your Contracts

Make sure that you clearly state roles & responsibilities of both parties and dispute resolution processes

Stay Informed

Attend webinars/seminars & other user group meetings

Develop a layered security approach

Perform a Due Diligence review of any third-party service providers for Online Banking Services

What your institution can do!

DETECT

Detection is closely associated with protection because some measures that protect also help identify fraud.

Layered Security

It has already been proven that a single layer is easy for hackers to get through. If one layer develops a security weakness then hopefully the other layers will provide sufficient protection.

Monitoring of IP Addresses

New User Controls

Calendar File – Frequencies and Limits

Dual Control

Fax or Out of Band Confirmation

Secure Brower or Secure Browser Key

Pattern Recognition Software

 **Train institution employees on Fraud warning signs**

What your institution can do!

RESPOND

- 📍 **Make sure your Incident Response Plan(IRP) includes procedures for a Corporate Account Takeover (Make sure that your IRP includes after-hours contact information for Corporate Customers)**
 - **Make sure that “all” employees are trained, with specialized training for employees that process Wires or ACH Transactions.**
 - **Update IRP to include the directory for FED ACH routing number contact information**
http://www.fededirectory.frb.org/search_ACH.cfm
 - **Make sure you have a Notice of Fraudulent Activity in your IRP**
 - **Procedures for processing a Fraudulent ACH file alert**
 - **Establish procedures for customer relations and documentation of recovery efforts**
 - **Develop a contingency plan to recover or suspend any systems suspected of being compromised**
 - **Make sure your IRP has procedures and contact information for the US Secret Service as well as other law enforcement and regulatory agencies**

What your institution can do!

RESPOND (Cont.)

- **Contact customer to verify fraudulent transactions**
- **Reverse all suspected fraudulent transactions**
- **Send a “fraudulent ACH file or wire alert” through FedLine**
- **Distribute list of transactions to a group of employees with calling assignments and instructions to call on the largest items first**
- **Ask the institutions to place a hold on the funds - send Notice of Fraudulent Activity letter**

What your institution can do!

A FRAUDULENT file was processed for _____ (Bank Name & ABA) in error on _____ (mm/dd/yy). The original file was processed on _____ (mm/dd/yy) with settlement of _____ (mm/dd/yy). The FRAUDULENT file was processed on _____ (mm/dd/yy) and will settle on _____ (mm/dd/yy). A reversal file was processed on _____ (mm/dd/yy) and will settle on _____ (mm/dd/yy). For additional information, contact _____ (Bank Name) at _____ (Bank's phone number).

_____ (Bank Name & ABA) hereby assumes all responsibility and liability for any processing errors, losses, damages and liability in any way arising out of the transmission of the broadcast message. _____ (Bank Name and ABA) also agrees to indemnify and hold harmless the Federal Reserve Bank, its agents and employees, from and against all claims, damages, lawsuits, and expenses, including reasonable attorneys' fees, in any way arising out of the transmission of the broadcast message.

What your Customers can do!

PROTECT

- 🛡️ **Education is Key – Train employees**
- 🛡️ **Install and Maintain Real Time Anti-virus/Anti-spyware/Firewall software and keep it up to date**
- 🛡️ **Secure your computer and networks**
- 🛡️ **Limit Administrative Rights**
 - Do not allow employees to install any software without receiving prior approval.
- 🛡️ **Install and Maintain Spam Filters**
- 🛡️ **Surf the Internet carefully**
- 🛡️ **Install security updates to operating systems and all applications as they become available**
- 🛡️ **Block Pop-Ups**
- 🛡️ **Do not open attachments from e-mail**
- 🛡️ **Do not use public Internet access points**
- 🛡️ **Recommend dual control from separate devices**

What your Customers can do!

DETECT

- Education is Key – Train their employees
- Reconcile Accounts Daily
- Be on the alert for suspicious emails
- Anti-virus/Anti-spyware/Firewall software and keep it up to date
 - Perform a full scan at least once a month
- Note any changes in the performance of your computer
 - Dramatic loss of speed, computer locks up, unexpected rebooting, unusual popups, etc.

What your Customers can do!

RESPOND

📌 Education is Key – Train their employees

Make sure that their employees know how and to whom to report suspicious activity to at the Company & the Institution

Contact the institution:

>If they Suspect a Fraudulent Transaction

>If they are trying to process an Online Wire or ACH Batch & receive a maintenance page.

>If they receive an email claiming to be from the institution and it is requesting personal/company information.

Questions or Comments
