Subject: Earned Wage Access (EWA).

I believe we in California and In the United States. Have the right to take a loan where we want instead of paying I interest on a loan the old way with payday loans.

If we as citizens can find someone to lend money cheaper that should be our right, not your right to force us to take a higher interest rate loan.

Besides it's our money we earned and paid taxes on. Leave our money alone. There's better things you politicians could be working on then trying to screw us Americans.

I personally can not wait to VOTE in 2024.
